

# TRANSTECH CVT FLUID

## PRODUCT DESCRIPTION

Formulated with fully synthetic base stocks and advanced additive technology that work synergistically to deliver excellent anti-wear protection, effective foam control, and strong resistance to thermal and oxidative degradation. Specifically designed for use in modern continuously variable transmission (CVT) systems, including both belt- and chain-driven designs, it provides smooth operation and durable protection across a wide range of driving conditions. Dyed red for identification purposes.

## BENEFITS

- Compatible with most seals and materials.
- Durable anti-shudder performance for smooth, consistent operation.
- Enhanced shear stability maintains effective lubrication.
- Excellent foam control.
- Optimised fuel efficiency and low-temperature fluidity.
- Superb oxidation and thermal stability.

## APPLICATIONS

Multi-vehicle formulation, compatible with most hybrid CVT transmissions.  
Do not use in DCT applications. \*Not suitable for applications with starting clutch.
